Cluster Samara Village, PJGF+RM3, Jl. Jenderal Gatot Subroto, Medang, Kec. Pagedangan, Kabupaten Tangerang, Banten 15334

A detail-oriented Software Engineer and Computer Science student with proven experience in full-stack web and mobile application development. Demonstrated success in architecting comprehensive project monitoring dashboards integrated with NLP-based AI Agents and developing complex management systems. Adept at leveraging modern frameworks like Next.js, React, Laravel, and Flutter to build scalable solutions. Passionate about translating technical requirements into efficient, user-centric platforms within professional development environments.

Work Experiences

Aryaduta Hotels Group - Tangerang, Indonesia Feb 2026 - Jul 2026

Full Stack Engineer

A leading five-star hospitality group under the Lippo Group, operating premium hotel properties across Indonesia. The company is committed to delivering world-class services while driving digital transformation in hospitality management.

- Collaborated with the management team over a 6-month period to identify reporting bottlenecks in manual spreadsheet tracking, driving the transition toward an integrated, data-driven solution.
- Engineered a custom Project Monitoring Dashboard utilizing Next.js, PostgreSQL, and a Telegram AI Agent to fully automate daily data capture and team task updates.
- Replaced slow legacy workflows with a centralized real-time system, equipping executives with instant access to reliable audit trails and significantly accelerating project reporting times.

Jakarta Schools Competition (JSC) - Jakarta, Indonesia Aug 2024 - Present

Full Stack Developer

Jakarta Schools Competition (JSC) is a youth sports management organization that hosts and organizes comprehensive school-level football competitions, providing a professional sporting environment for student-athletes.

- Evaluated and addressed critical scalability limitations in legacy manual systems to effectively manage high-volume athletic data for 50+ schools and over 1,000 student-athletes.
- Worked alongside event organizers to architect a centralized management platform using Laravel and MySQL, optimizing the database to handle complex, ongoing tournament scheduling.
- Deployed a fully automated platform that eliminated manual tracking errors, drastically streamlining administrative operations and enhancing data accuracy for multiple competitive seasons.

Gamelab Indonesia - Salatiga, Indonesia Jan 2022 - Apr 2022

Front End Developer

An educational digital platform operated by Educa Studio focused on providing industry-standard vocational courses and certified internships to enhance digital skills.

- Tackled the challenge of digitizing intricate, traditional batik artistic elements into a modern mobile layout over an intensive 4-month development cycle.
- Served as the primary Frontend Developer, utilizing Flutter and Dart to systematically translate complex design concepts into a highly responsive, cross-platform application.
- Successfully delivered a functional mobile portfolio that rigorously preserved the original aesthetic value while greatly expanding the client's digital reach and audience accessibility.

Education

Universitas Multimedia Nusantara - Tangerang, Indonesia Aug 2023 - Aug 2027 (Expected)

Bachelor of Computer Science, 3.37/4.00

Organization Experiences

Teater KataK - Tangerang, Indonesia Sep 2023 - Dec 2024

- Performed as the lead drummer for a large-scale musical theater production, managing complex musical rhythms and performance dynamics to support live stage storytelling for an audience of 500+ attendees.
- Served as the Sound Designer for the event, curating the audio experience for 100+ attendees by precisely synchronizing musical cues and sound effects to enhance the narrative flow of the stage production.
- Acted as the Music Coordinator, leading and managing a team of 15 musicians to ensure high-quality musical delivery, while fostering group synergy and technical coordination from rehearsals through to the final performance.
